Shhharades

By: Still Figuring It Out

It's the week before Christmas! Work together with your siblings to unlock the closet where your parents are stashing the presents! Be careful not to be too loud, you don't want to wake your parents!

One player takes on the role of the sibling sneaking around the room. The other players, or siblings, must use the Riddle Book to guide the sneaking sibling to different objects in the room to help them put together the correct passcode.

Instructions:

1. At the beginning of the game, the first number of the passcode will be displayed on the bottom left of the screen. The passcode numbers correspond to the page numbers in the Riddle Book.
2. The siblings with the Riddle Book will need to decipher the riddle on that page to discover the next object to go to.
3. The siblings with the Riddle Book cannot talk! Use charades to act out the item the sneaking sibling needs to go to.
4. Once the sneaking sibling has reached the object, a number should appear on the screen when looking at it. Add that number to the passcode (using [E]) and use it for the next page number in the Riddle Book.
5. Be careful to not be too loud! Making too much noise reduces the time left on the clock!
6. There are obstacles throughout the scene. Avoid running into them! Colliding with obstacles creates noise (disturbs the parents) and reduces the amount of time left on the clock.
7. When you have all 6-digits of the passcode, interact with the door to attempt to unlock it!

In-Game Controls:

- Use your voice to move the character forward
- Use A / S or Left / Right arrow keys to turn left and right
- Use [E] to interact with objects (to add numbers to the passcode or to interact with the door)
- Use [R] to remove a number from your passcode
- When you think you have completed the passcode, use [E] to interact with the door!
- Use [ESC] to pause the game
